Ensuring Safety
Every truck is roadworthy. Every driver is home safely.

Introducing CSC

Safety

Mission Statement

Carrier's Safety Consultants (CSC) in partnership with commercial insurance underwriters provides risk management solutions to trucking industry professionals, which identify through inspection and correct through training those factors that lead to hazardous working conditions.

Our Program

At the heart of CSC are its experienced Safety Consultants. CSC's Consultants are safety professionals that work in the field, hands-on with motor carriers and their drivers to monitor losses, identify vocational risk factors, ensure regulatory compliance and provide a meaningful pathforward with corrective action(s).

CSC exists solely to assist motor carriers in the creation/improvement of efforts that lead to a safer working environment. In our experiences, operations with poor safety records face numerous consequences: lost productivity due to injuries; financial tightening from increased insurance premiums, litigation and lost productivity; decreased morale from employee insecurity; and the intangible lack of trust from customers and peer groups. To be successful in the busy, increasingly regulated world of the trucking industry, motor carriers cannot ignore their responsibility to provide a safe and competent working environment and CSC is here to help.

A • Operational Safety Surveys and Vehicle Inspections

The first phase of our efforts is in the discovery process. Through safety surveys, information provided by our insurance partners and on-site inspections, CSC Safety Consultants gain a definitive look into a carrier's operational safety and regulatory compliance of both Federal and State requirements. This process provides a unique and undistorted view of the safety within a carrier's organization. Disclosure of these findings and recommendations for improvement are presented to motor carriers and underwriters for review in both verbal and written format.

B • Routine Visits

A motor carrier's safety status can change drastically in a short period of time. Because of this, it is vitally important to monitor a carrier's safety-related activities and to reinforce operational safety as a fundamental part of doing business. In support of this, CSC's Safety Consultants visit its carriers throughout the year to review and discuss topics such as recent first reports of loss, new driver selection, loss trends, success stories and those areas critical to the success of the program.

C • * Driver Safety Program

For those clients that desire a more comprehensive safety program, CSC's Safety Consultants will complement the basic program with the following services:

- Quarterly driver safety meetings
- Driver selection assistance
- Large Safety Banners (hung throughout the property to reinforce the safety message)
